

Dear Mark

I am very pleased that I went ahead and trialled the products, and I'm blown away by the results. Thanks to your prompt service there was no interruption to our business while the trial was underway.

ESG Green Washroom controlled-use toilet paper dispensing systems have been able to reduce the consumption of toilet paper considerably, the dispensers being designed to give the patron the amount of paper they need rather than the amount of paper they want is ingenious.

Basically by changing to the ESG Green Washroom Systems we now have no product wastage, reduced maintenance workload, no mess, no blockages and importantly we are now using products that are environmentally friendly.

I have no hesitation whatsoever in recommending The Distributors Perth and ESG Green Washrooms for their washroom consumable products.

Thanks again for your great service and I am looking forward to a long business relationship together.

Kind Regards,

Troy Griffin
Manager
