Maintenance
and Hygiene
Solutions

* Many dispensers are provided "free-on-loan" when used with True Blue Chemical products. For more information contact your account representative or True Blue Chemicals.

Industrial Cleaning Products

Degreasing Solutions

Touchdown - Heavy Duty Quick Break Cleaner / Degreaser

Touch Down is a fast acting, fast breaking heavy duty degreaser. Emulsifiers & solvents get straight to work removing and solubilising the broad spectrum of soils found eg. petroleum based grease, soil, animal fat, industrial swarf, road grime, ink, water based paint, food & beverage spills, rubber & tyre marks. Safe to use on aluminium.

Touch Up - Heavy Duty Cleaner / Degreaser

Touch Up is a fast acting, fast breaking heavy duty degreaser that removes petroleum based grease, soil, animal fat, industrial swarf, road grime, ink, water based paint, food & beverage spills, rubber & tyre marks.

Liquidate - Heavy Duty Cleaner & Quick Break Degreaser

Liquidate is a heavy duty cleaner & quick break degreaser excellent for use where waste water purity & spent oil/grease recovery is critical. Liquidate's formula contains no solvents or caustic hydroxides to emulsify wastes as used in most conventional degreasers.

Cellarclean - Quick Break Degreaser

Combines instantaneous grease and oil emulsification. Cellarclean's solvent system penetrates and solubilises heavy petroleum based deposits, then suspends these ready for rinsing. The rinsing action temporarily combines the deposits with the water phase and washes them from the affected surface after 20 to 30 minutes, Cellarclean then releases both the soil and itself from the water producing two phases, the first containing all the industrial soil and degreaser (ready for removal prior to release to sewerage) and the second containing water.

Pink Multiclean - Multi Purpose Cleaner

Pink Multiclean is a free rinsing liquid multi purpose cleaner. Pink Multiclean is used to clean and maintain asphalts, rubber, cork, linoleum, plastic, tile and such surfaces as painted walls or woodwork, any hard surface found in commercial, industrial or institutional buildings.

Ensuring an expertly clean result

Vehicle Cleaning Solutions

Trucking Kleen - Vehicle Wash Detergent

Trucking Kleen eliminates brushing, scrubbing and drying, whilst at the same time providing an effective dirt, mud, diesel and general road grime solubiliser. Trucking Kleen is used on all surfaces from acrylic and enamel paint work to engines, stacks, chassis, trays and tyres.

Hand Cleaning Solutions

Shift Gel - Industrial Hand Gel with Grit

Shift Gel is a natural industrial hand cleaner with grit and does not contain petroleum solvents. Shift Gel leaves your hands refreshingly clean with a natural citrus fragrance.

Alkaline Cleaner

Trooper - High Alkaline Cleaner & Banana Sap Remover

Trooper is a highly concentrated banana sap remover however the non solvent based formula with high dilution rates makes it ideal for use in industrial environments. Trooper is safe for the end user and the environment. Trooper is easy to use and can be dispensed via a number of methods. Trooper is ideal for all banana processing plants, packing sheds, handling equipment and mechanical repairs.

True Blue is an Australian, family owned company that has been manufacturing and supplying a wide range of businesses in the hospitality, healthcare and industrial sectors with cleaning products & hygiene solutions for more than 25 years.

At True Blue, we provide our customers with a full service offering of products, dispensing equipment, site audits, safety compliance, support and training programs. We have qualified chemists developing formulations that are effective, innovative and environmentally responsible.

Our products are of the highest quality and concentration, providing greater value and reduced cost-in-use than any of our major competitors.

At True Blue Chemicals, we pride on ourselves product quality, exceptional performance and genuine, responsive service.
